**November 2004**

LOUISVILLE, CO —Biotrol, makers of infection control products and preventive products for the dental industry, announces a new addition to their Evacuation System product line.

### **Surgical Evacuation Tips – Economy Pack**

**Made of durable, high quality polypropylene to prevent bending during procedural use, these surgical evacuation tips provide excellent cheek retraction. They are suitable for standard surgical aspirator procedures, as well as for in-office whitening. The positive 30° angle allows necessary visual contact. They are available in 0.125” tip (white) and 0.25” tip (green), 6.5” long, and are autoclavable. Product availability: November 22, 2004.**

Biotrol has a full line of dental infection control, evacuation, and preventive products to accommodate your needs. Biotrol products are available only through authorized dealers.

If you would like more information about Biotrol and our products, please call 800.822.8550, M-F, 7:00 am -5:00 pm Mountain Standard Time or visit our web site at [www.biotrol.com](http://www.biotrol.com).
